

ONE NUMBER

OPTIMAL AVAILABILITY
FOR MOBILE WORKFORCE

COST EFFECTIVE DECT ALTERNATIVE

REDUCE ROAMING & INTERNATIONAL CALL COST

One Number for Mobility and Convergence

One Number delivers optimal availability for fixed and mobile calls. The solution enables one to be reachable at any time with a single number. Employees can benefit from the corporate features on their mobile phones. The company is making cost savings thanks to convergence.

- REDUCE ROAMING COAST
- ANSWER CALLS FROM ANY DEVICE
- USE MOBILE PHONE AS A DECT PHONE
- SAVE ON CALL COSTS

→ Answer incoming call from any device

Thanks to One Number, a caller uses a single number to reach his correspondent. Multi-ring allows desk and mobile phones to ring simultaneously. The user answers the call wherever he is. One Number for Mobility and Convergence is the solution for being reachable efficiently.

→ Use your mobile phone as a DECT alternative

Landline features become available on the company's mobile phones: three party conferencing, call transfer, corporate short dial plan access, music on hold, voice mail, office phone number display. Calls originated from the mobile phone display the One Number.

→ Answer a call from a desk phone and continue on your mobile phone

The phone number is no longer device dependent. If a user answers a call on his desk phone, during the communication

he can swap the call to his mobile phone with Handover function. Alternatively, he can continue his call by changing network seamlessly with Voice Call Continuity (VCC).

→ Save on fixed to mobile calls and roaming costs

Each fixed and mobile call, incoming or outgoing, is going through the company's infrastructure. All these calls are analysed in order to use the most cost effective network. You can reduce roaming costs by using call back or LCR services. A summary of all calls allows statistics and analysis of overall fixed and mobile traffic.

→ Activate corporate features on mobile phones with MobiQ®

MobiQ® is a friendly user interface for Smartphones. It delivers a unique user experience and maintains work efficiency for mobile workers. Employees can benefit from all the useful PBX features on their mobile phone.

**FIXED TO MOBILE CONVERGENCE
SOLUTION FOR ENTERPRISE**

One Number for Mobility and Convergence

CONVERGENCE SOFTWARE SOLUTION
FOR QUESCOM EQUIPMENT

COMPATIBLE WITH ALL PBXs
ISDN, SIP, H.323

WORKS WITH EVERY
GSM TERMINAL

INDEPENDENT OF
OPERATORS OFFERING

How does the solution work?

Without MobiQ®
DTMF key strike

- second call**
+ *2 + N° + #
- swap**
⇄ *2
- conference**
☎ *0
- music on hold**
⏸ *

With MobiQ®
User interface for Smartphone

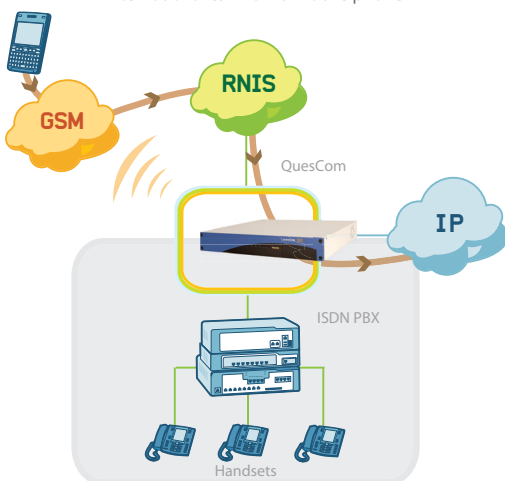

How to integrate One Number into your architecture?

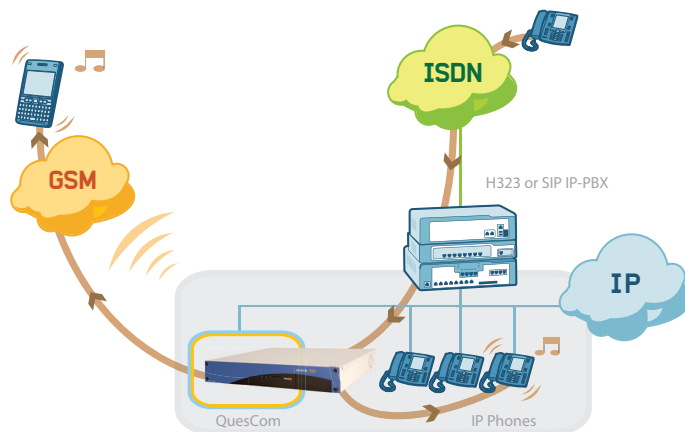

The solution is an application integrated into QuesCom equipment activated with a licence. Equipment is installed:

- Either in pass through mode between the operator's network and the PBX (PRI or BRI)
- Or on an IP link to the IPBX (SIP, H.323)

With a legacy architecture International call from a mobile phone

With a VoIP architecture Incoming call with multi-ring function

COMPATIBILITY

All GSM terminals by using DTMF key strike.
Smartphones with Symbian, Windows Mobile, BlackBerry, iPhone® are
MobiQ compatible (Check the MobiQ compatibility list)
All operators ISDN, IP & GSM.

ADMINISTRATION

Web interface for redirection. Profile management from web or
MobiQ .
On the PBX, calls from mobiles go through the corporate infrastructure.
Exclude list can be configured.

PART NUMBERS

- Hardware
QuesCom 200 or QuesCom 400 (see datasheet)
- Licences
LMobility-XXX
